SUMMARY

Computer Engineering student building machine-learning systems and the full-stack apps around them. Data Science Intern at Botnoi Group (2026). Built a deep-learning skin-cancer screening system (0.91 AUC-ROC), a flood-monitoring platform for the DOH Hackathon, and a runner-status checker used by ~300 runners. Seeking Data/AI or full-stack internship opportunities.

EXPERIENCE

Data Science Intern — Botnoi Group — May - Jul 2026

- Developed, trained, and evaluated machine learning models for real-world business use cases.
- Cleaned and preprocessed complex datasets and engineered features that improved model accuracy.
- Worked with engineering and product teams to deliver AI-powered solutions and data-driven insights.
- Applied best practices in data-pipeline design and model-deployment workflows.

PROJECTS

Skin Cancer Screening & Classification — Deep Learning — CPE310 Healthcare AI · 2026

8-class skin-lesion classifier trained on ISIC 2019 (25,331 images). Benchmarked ResNet50, EfficientNet-B3, and DenseNet121 with class-weighted loss; the best model reaches 0.91 AUC-ROC for cancer screening and 89.6% top-2 accuracy, served through a Gradio clinical UI.

Python · PyTorch · scikit-learn · Pandas · Deep Learning · Computer Vision · Gradio

Smart Flood AI — Computer Vision — DOH Hackathon · Team of 2 · 2026

Real-time flood monitoring command center for the Department of Highways hackathon. Zero-shot Grounding DINO finds cars and wheels in CCTV footage to estimate water depth, feeding a Next.js dashboard with flood-aware routing and LINE OA alerts.

Python · PyTorch · OpenCV · Grounding DINO · FastAPI · Next.js · Firebase · Computer Vision

WELLYNC — Healthcare · GenAI — True Innovation competition · Team · 2026

Chronic-care prototype connecting patients, caregivers, and doctors — multi-factor early-warning alerts, PDPA-aligned consent, and Gemini-powered tools that read device screens, analyze meals, and draft care plans.

Next.js · TypeScript · Tailwind CSS · Generative AI · Gemini

SWU Run Together 2026 — Web App — SWU Athletics Club · Team of 2 · 2026

Registration and order-status checker for a university running event. Runners search by phone number to get a digital BIB with their package, shirt size, and payment status, read live from Google Form responses.

React · JavaScript · Vite · Google Sheets

BrainFit — Mobile App — Client project · Team of 5 · 2025

Brain-training app commissioned by nursing students to support people with brain-related conditions such as Alzheimer's. Runs on iOS and Android with memory and logic mini-games, using Google Sheets as a lightweight backend to track each player's progress.

React Native · Expo · JavaScript · Google Sheets

LEADERSHIP & TEACHING

Computer Engineering Student Leader — Dept. of Computer Engineering, SWU — 2024 - Present

- Represent Computer Engineering students at faculty meetings and university events as the main link between students and faculty.
- Plan and run workshops, meetings, and student-development programs for the department.

Robotics Teaching Assistant — Srinakharinwirot University — 2026

- Taught robotics and programming fundamentals to high-school students in hands-on sessions.
- Prepared and maintained the robotics equipment and ran live robot-programming demos.

Metaverse Presentation Assistant — Srinakharinwirot University — 2025

- Assisted with a lecture on Metaverse technology, explaining how VR, AR, and AI work together in virtual worlds.
- Built interactive slides and live demos to keep the audience engaged.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering in Computer Engineering — Srinakharinwirot University (SWU) — 2024 - Present · Expected 2027

Coursework: Software Development, Database Systems, Artificial Intelligence, Healthcare AI Systems, Computer Architecture, Electronics

Google Cloud, Big Data & GenAI Training — Google Cloud — 2026

SKILLS

ML / DL: PyTorch, scikit-learn, OpenCV, Machine Learning, Deep Learning, Computer Vision

Data: Pandas, NumPy, Matplotlib, Seaborn

Full-stack: React, React Native, Tailwind CSS, HTML, CSS, Node.js, Firebase, MySQL, Google Cloud

Languages: Python, TypeScript, JavaScript, Java, C/C++

Tools: Git, Figma, Unity
